# Regulatory Body Representatives Meeting

## ISOE Symposia in Cambridge 2010

# Preface and Introduction

# Proposal for today schedule

- preface
- introducing the new participants
- reports: national approach to handle with information on events
  - Canada
  - France
  - Germany
  - Slovenia
  - Sweden
  - Switzerland
  - USA (answers on questionnaire, information on internet)
  - Japan (example from Nuclear Information Archives)
- coffee break ?
- overview on answers
- discussion on most interesting aspects
- outlook: discussion on further steps
- lunch ?

# Proposal for today schedule

- **preface**
- introducing the new participants
- reports: national approach to handle with information on events
  - Canada
  - France
  - Germany
  - Slovenia
  - Sweden
  - Switzerland
  - USA (answers on questionnaire, information on internet)
  - Japan (example from Nuclear Information Archives)
- coffee break ?
- overview on answers
- discussion on most interesting aspects
- outlook: discussion on further steps
- lunch ?

# Regulatory Body Representatives Meeting: Open Forum to Exchange and Discuss Information between Regulatory Bodies on RP in NPP

## History of RBM:

Idea was born at Steering Committee in Vienna  
2003

- 1. 2004 Lyon : General Information about the Supervision by Regulators
- 2. 2006 Essen : Inspection approaches
- 3. 2008 Turku : Contamination management
- 4. 2010 Cambridge : Feedback from Events

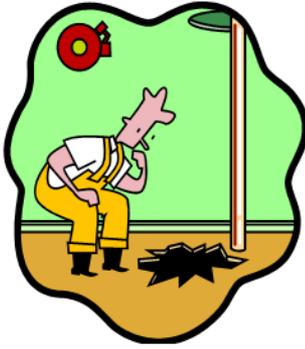

# Motivation 4. RBM in Cambridge 2010

- 2009 ISOE Symposium in Vienna, Report from Helena JANZEKOVIC about database on events concerning RP:
  - IRS-Reports (IAEA) does not include enough information to get **Lessons Learned** in the RP field
  - some national or bilateral database are better (e.g. OSIRIS)
- Topic proposed at 2009 Management Board in Paris: „**How are lessons learned from radiological events drawn up, reported and distributed among RP-persons (experts, officers, commissioners ...) in**
  - **NPP (units, plants, companies)**
  - **training facilities, association and reg. bodies**”

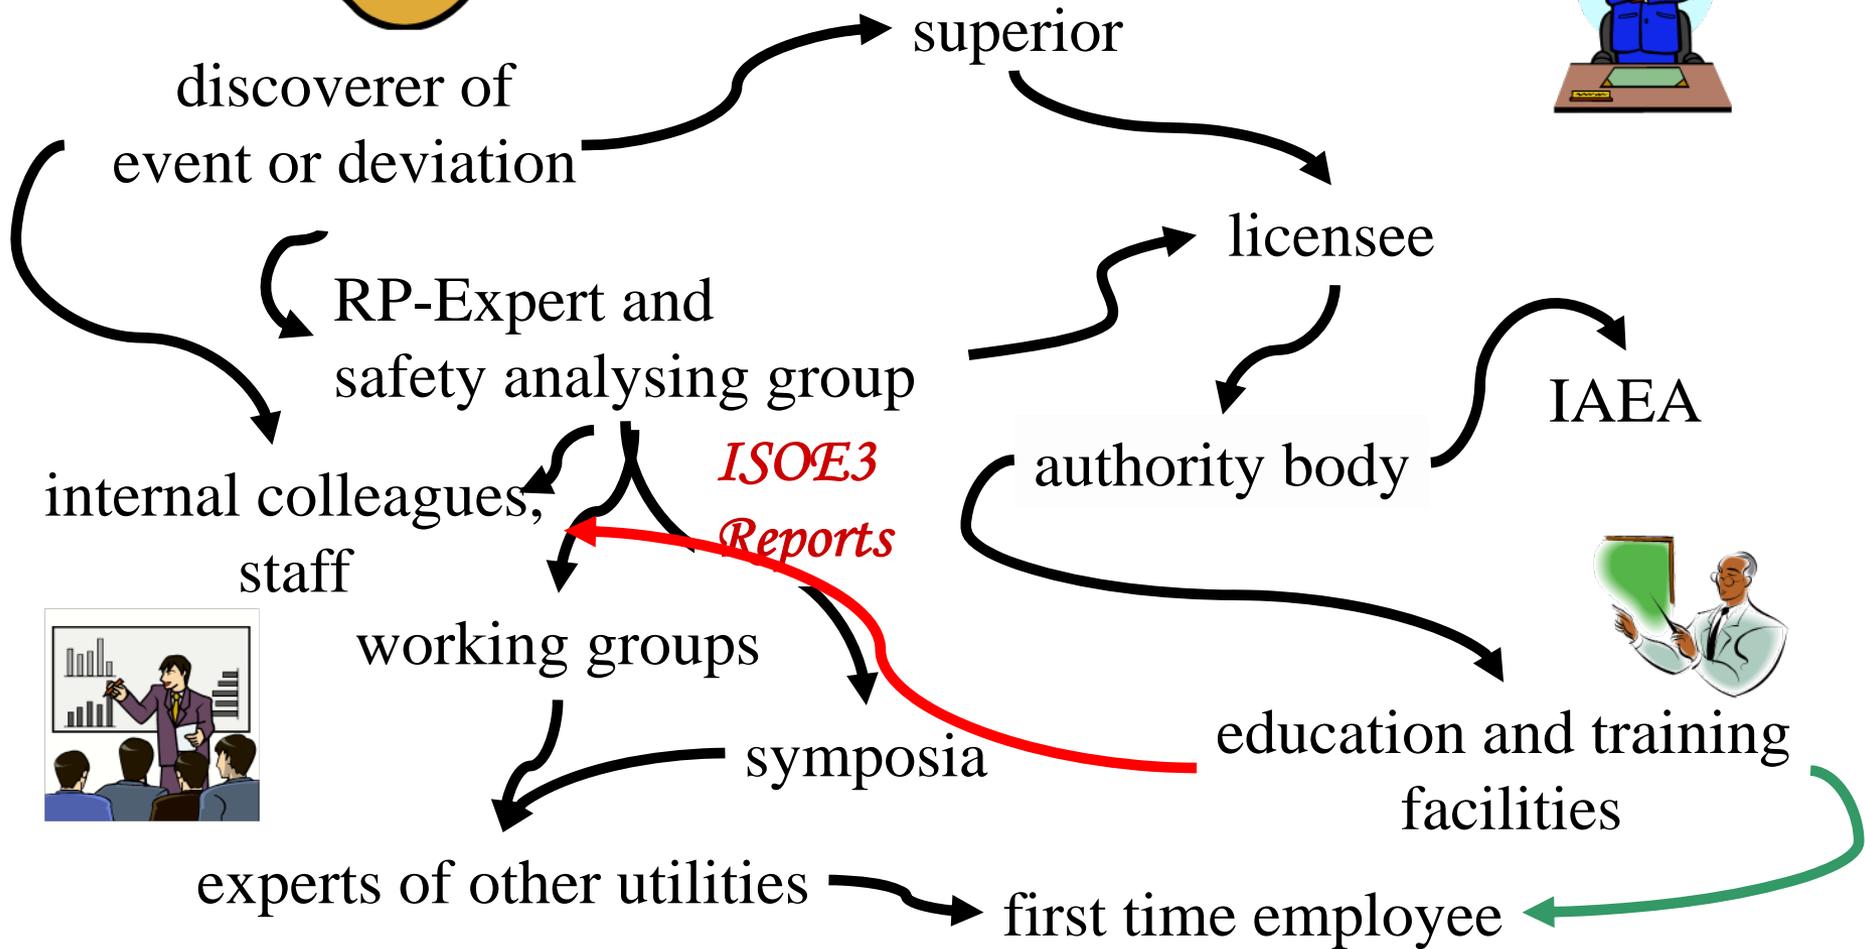

# “Feedback from Events”

- **lessons learned from events are highly valuable:**
- they show necessary improvements on actual problems
- which are not theoretical (as in the RP-planning or in some training courses)
- but really (practical)
- **lessons learned have to reach all persons who may be concerned**

# tracks of information

# Aspects of Interest

1. Which **criteria** are defined for nomination an event as an event of interest? Which terms and definitions are used?
2. Which requirements are installed by the authorities for **event analysis management in NPP?**
3. How is the information **reported and distributed outside the NPP?**
4. How does the information is **brought into the training and education** of staff?

# GOAL of the Meeting

- exchange of information about event feedback management focusing on good ideas
- looking for database or information exchange platform for event feedback:
  - already existing databases (Osiris, IRS, ...)
  - new databases (proposal send to ISOE-Bureau in May 2010, Red Book, web-based ISOE event reports,...)
- Which parameters and rules we need ?
  - Should it be restricted to the utilities?
  - Should it be restricted to ISOE-Members?
  - Should it be open for the Public?
  - Should it be anonymous (without any hint on the names)
  - ....
- Proposal to ISOE about new ISOE reports

# Proposal for today schedule

- preface
